“Care home happy with  
BriQ XXL special concept.”

Testimonial

Annemargriet van  
Teeseling-van den Berg  
Facilities Department  
Team Leader

Residential care home Spoorwiel is the ninth location operated by the Schakelring care institute in Waalwijk. This new building has been constructed in line with the latest ideas about caring for the elderly.

The **disabled toilets** are **equipped with** the Satino Black **BriQ XXL** concept. The extra-large folded toilet paper and associated dispensers have also been installed in the somatic nursing department. Annemargriet van Teeseling-van den Berg, Facilities Department Team Leader:

“We are always interested in innovation in healthcare and the Satino Black BriQ XXL concept is an excellent example of this. After the presentation at the Satino Black factory in Swalmen, our carers were extremely eager to try out this extra-wide toilet paper. The results have been 100% positive: **the carers are able to grip the paper more easily and use less toilet paper**. In addition, one sheet of XXL fits exactly on the base of a bed pan, which is handy. So BriQ XXL was an obvious choice.

Satino Black is supplied by Ological, which is quite local to us as the company is based in Hoeselt. We like to work with regional suppliers as much as possible. That boosts the local economy and reduces our transport movements and costs. Sustainability is an important factor in everything we do. For example, we also work with people who are disadvantaged in the labour market. Satino Black **perfectly matches our sustainability policy**. It is Cradle to Cradle certified and produced in a zero carbon facility. That appeals to us immensely.”
