

Satino

The only washroom mirror that reflects it's architecture

The smooth appearance of the all-in-one concept
upgrades every single washroom

Satino Multi Mirror

All the existing dispensers and mirrors become redundant with the placement of one or more Multi Mirrors. The all-in-one concept offers a mirror with a built-in reservoir for paper hand towels, soap and an air-freshener. Additionally, the ambient lighting on the upper side and the subtle front lighting provide a feeling of optimal luxury and comfort. The stylish design of the Multi Mirror upgrades every single washroom.

Topsportshall T-Kwadraat and Ireen Wüst Ice Skating Rink

Declared as the BNA Building (BNA = Association of Dutch Architects) of 2010 in the South Region

Bo.2 architecture and urban construction designed locational sports facilities for a versatile public program in cooperation with Van Hoogmoed architects.

A balanced design, inside and outside

As of 15 Multi Mirrors, clients can customize the appearance of the design. The design of the facade of the building is also reflected in the washroom. The design of the facade of the building is also reflected in the washroom. The visitor's perception near the entry will be recognized in the washroom. Serenity and design meet each other. Model Horizon is available with and without ambient lighting.

Multi benefits

Saves Space

- all-in-one
- ideal for small spaces

Hygiene and Comfort

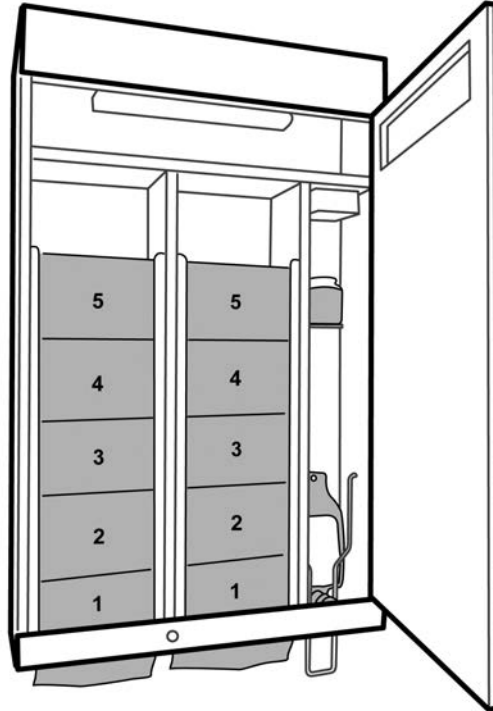

- always a hand towel, large capacity
- everything at an arm's length, no splatters
- service concept for complete care

Economical

- less cleaning and refill necessary
- lower use of paper, optimal paper size

Social responsibility

- returnable and recyclable
- robust construction
- safe, laminated mirror

Connectable

The Multi Mirror can be placed individually or combined with more units, depending on the space. Each Multi Mirror contains almost 3000 paper hand towels so the frequency of refilling becomes much lower.

Measurements

96,5 x 60 x 14,5 cm (LxBxD)

230V (Horizon)

wood laminate or black MDF

Sustainability and Recyclability

The design of the Multi Mirror is based on the use of as many sustainable materials possible. They are put on the market in a lease construction (the users pay only for their use), or for sale with a residual value guarantee. Both possibilities are based on a return policy, after which the product is made suitable again to be put in the market.
